YAMLess Test Report — 2026-10-31 (issue #15)

Summary

147/147 tests passed across all test suites.

Issue #15 — .NET / C# Runtime Support

Problem

YAMLess returned `runtime: unknown`, `shape: unknown`, no dependencies, and `secrets: []` on .NET repos. Two root causes: 1. No NuGet / `.csproj` parser 2. `_find_dockerfile` only checked the repo root — .NET solutions conventionally put `Dockerfile` inside the API project subdirectory

Changes

File	Change
`profile.py`	`Runtime.DOTNET = "dotnet"`
`dockerfile.py`	`dotnet/aspnet|runtime|sdk` image patterns; `_find_dockerfile` searches one level deep, prefers `api` / `web` dirs
`dependencies.py`	NuGet package maps (Npgsql, StackExchange.Redis, AWSSDK.S3/SQS, Confluent.Kafka, etc.); `get_dotnet_package_names()` rglobs `*.csproj` skipping test projects; `_parse_dotnet()`
`env_scanner.py`	`_scan_appsettings()` — flattens secret leaf keys + `${VAR}` placeholders from `appsettings*.json`
`runner.py`	`*.sln` / `*/*.csproj` detection in `_infer_runtime_from_files`; dotnet branch in `all_dep_names` dispatch
`tests/fixtures/dotnet-api/`	Multi-stage `Api/Dockerfile` (aspnet:8.0), `Api/Api.csproj`, `Api/appsettings.json`

Detection coverage

Databases: Npgsql, Npgsql.EntityFrameworkCore.PostgreSQL → postgres; MySqlConnector, Pomelo.EntityFrameworkCore.MySql → mysql; Microsoft.Data.SqlClient → sqlserver; Microsoft.Azure.Cosmos → cosmos

Cache: StackExchange.Redis, Microsoft.Extensions.Caching.StackExchangeRedis, NRedisStack

Storage: Azure.Storage.Blobs, AWSSDK.S3, Google.Cloud.Storage.V1

Queue: Azure.Messaging.ServiceBus, AWSSDK.SQS, RabbitMQ.Client, MassTransit

Kafka: Confluent.Kafka, MassTransit.Kafka

HTTP shape: Swashbuckle.AspNetCore, Microsoft.AspNetCore.OpenApi, Carter, FastEndpoints, NSwag.AspNetCore

New Tests (11)

- `test_dotnet_runtime_detected_from_dockerfile` — aspnet:8.0 image → DOTNET, version 8.0
- `test_dotnet_nested_dockerfile_found` — Api/Dockerfile resolved from fixture
- `test_dotnet_nuget_packages_parsed` — all 5 packages from Api.csproj
- `test_dotnet_full_profile` — runtime, version, port, shape all correct
- `test_dotnet_database_detected` — Npgsql.EntityFrameworkCore.PostgreSQL → postgres
- `test_dotnet_cache_detected` — StackExchange.Redis → cache=True
- `test_dotnet_storage_detected` — AWSSDK.S3 → storage=True
- `test_dotnet_queue_detected` — AWSSDK.SQS → queue=True
- `test_dotnet_appsettings_secrets_scanned` — JWT_SECRET, REDIS_URL from appsettings.json
- `test_dotnet_inferred_from_csproj_without_dockerfile` — runtime inferred from Src/MyApp.csproj
- `test_dotnet_test_projects_excluded` — App.Tests.csproj ignored

Test Counts by Suite

Suite	Tests	Status
test_analyzer.py	37	✓ All pass
test_arch_drift.py	25	✓ All pass
test_env_scanner.py	18	✓ All pass
test_gap_filler.py	2	✓ All pass
test_renderer.py	62	✓ All pass
test_validator.py	3	✓ All pass
Total	**147**	**✓ All pass**

Branch

Committed to `develop`, merged to `main` (commit `77258f3`).
