YAMLess — Implementation & Test Report

Issues #18 and #19

Date:	2026-11-05
Commit:	9dc0061
Branch:	develop
Result:	181 passed — 0 failed

Summary

Two issues were resolved in commit 9dc0061 on the develop branch of the YAMLess project. The changes extend the analyzer's app-name normalization logic and add source-code scanning support for C#, Java, and Kotlin environments.

Issue #18 — App Name Slugification

Problem

App names derived from repository names could contain characters that are invalid in Azure resource names (dots, underscores, uppercase letters, leading/trailing dashes). Storage account names and Key Vault names have especially strict length and character constraints.

Implementation

src/yamless/analyzer/runner.py — _slugify() function added:

- Lowercases the input string
- Replaces runs of non-alphanumeric characters with a single dash
- Strips leading and trailing dashes
- Truncates to 40 characters

Storage module (modules/storage/main.tf, Container Apps & AKS): strips both - and . before the 24-character substr truncation.

Key Vault module (modules/keyvault/main.tf, Container Apps & AKS): uses trimsuffix(trimprefix(...)) to prevent trailing or leading dashes after truncation.

New Tests — Issue #18

Test	File	Description
test_slugify_plain_name	test_analyzer.py	Simple lowercase name unchanged
test_slugify_lowercases	test_analyzer.py	Uppercase letters are lowercased
test_slugify_dots_replaced_with_dashes	test_analyzer.py	Dots converted to dashes
test_slugify_underscores_replaced	test_analyzer.py	Underscores converted to dashes
test_slugify_leading_trailing_dashes_stripped	test_analyzer.py	Leading/trailing dashes removed
test_slugify_multiple_separators_collapsed	test_analyzer.py	Consecutive separators collapsed
test_slugify_truncates_to_40_chars	test_analyzer.py	Output truncated at 40 chars
test_slugify_dotted_repo_name	test_analyzer.py	Real-world dotted name slugified

Issue #19 — C# and Java / Kotlin Environment Variable Scanning

Problem

The environment variable scanner only handled Python, Node.js, and config-file patterns. Applications written in C# or Java/Kotlin that read secrets via Environment.GetEnvironmentVariable, IConfiguration, or Spring @Value annotations were not discovered.

Patterns Added

Pattern	Language	Emitted Key
Environment.GetEnvironmentVariable("KEY")	C#	KEY
System.getenv("KEY")	C# / Java	KEY
configuration["Section:Key"]	C# (IConfig)	SECTION__KEY
GetConnectionString("Name")	C#	NAME
@Value("${prop.name}")	Java / Kotlin	PROP_NAME

Generated C# files (*.Designer.cs, *.g.cs) are automatically skipped.

New fixture: tests/fixtures/dotnet-api/Api/Program.cs

New Tests — Issue #19

Test	File	Description
test_cs_environment_get_env_variable	test_env_scanner.py	GetEnvironmentVariable key extracted
test_cs_configuration_indexer	test_env_scanner.py	configuration[...] -> SECTION__KEY
test_cs_get_connection_string	test_env_scanner.py	GetConnectionString -> NAME
test_cs_generated_file_skipped	test_env_scanner.py	*.Designer.cs files ignored
test_java_system_getenv	test_env_scanner.py	System.getenv key extracted
test_java_spring_value_annotation	test_env_scanner.py	@Value prop.name -> PROP_NAME
test_java_spring_value_with_default	test_env_scanner.py	@Value with default strips default
test_kotlin_spring_value_annotation	test_env_scanner.py	@Value pattern in .kt files
test_dotnet_fixture_program_cs_configuration_indexer	test_analyzer.py	End-to-end: config indexer key
test_dotnet_fixture_program_cs_stripe_key	test_analyzer.py	End-to-end: Stripe key detected
test_dotnet_fixture_program_cs_sendgrid_key	test_analyzer.py	End-to-end: SendGrid key detected

Full Test Results

Total: 181 passed — 0 failed — 1 deprecation warning (no action required)

Test File	Tests	Result
tests/test_analyzer.py	47	PASSED
tests/test_arch_drift.py	26	PASSED
tests/test_env_scanner.py	36	PASSED
tests/test_gap_filler.py	2	PASSED
tests/test_golden.py	13	PASSED
tests/test_renderer.py	54	PASSED
tests/test_validator.py	3	PASSED
Total	181	PASSED

Files Changed

File	Change
src/yamless/analyzer/runner.py	Added _slugify() function
src/yamless/analyzer/env_scanner.py	Extended for C# / Java / Kotlin
renderer/container_apps/modules/storage/main.tf	Strip - and . before 24-char truncation
renderer/container_apps/modules/keyvault/main.tf	trimsuffix/trimprefix after truncation
renderer/aks/modules/storage/main.tf	Same storage fix for AKS
renderer/aks/modules/keyvault/main.tf	Same Key Vault fix for AKS
tests/test_analyzer.py	8 slugify tests + 3 dotnet fixture tests
tests/test_env_scanner.py	8 C# / Java / Kotlin scanner tests
tests/fixtures/dotnet-api/Api/Program.cs	New C# fixture
